

Centrafix™

Installation Guide

The Centrafix™ installation method is an alternative solution to the New Zealand Building Code standard installation method.

This new BRANZ Appraised installation method recesses the window or door back inside the building wall, minimising thermal losses which occur in a typical installation. This aligns all insulation elements – wall, window frame, glazing – and prevents cold air from circulating around the window and door frames.

Scan the QR Code below for full installation details.

Codemark Certificate CMNZ10033

BRANZ appraised. Appraisal No. 1188 (2023)

New Zealand Des. Reg. No. 429382
