

Entrance DOORS

The defining feature of your home

First Entrance Doors

A good entrance door does more than just provide access; it makes a statement.

The inspiring thing about the First range is that you can make any statement you like, from a nod to tradition in the form of tongue-and-groove, to something clean and architectural in glass, to a declaration of your unique style with an individualised combination of patterns and colours.

The common theme is quality.

First Entrance Doors are built to last with low maintenance, enhanced stability, security and thermal efficiency. What's more, they are widely available wherever you live, thanks to a network of almost 40 manufacturers nationwide. So make your statement with First Windows & Doors.

Why choose our expertly designed entrance doors

Low maintenance

Our doors are easy to clean and require little upkeep to keep them in top condition.

Durability

Our doors are built to last, expertly designed and built with the latest manufacturing technologies for maximum strength and stability.

Stability

Built with durable materials, there is little risk of the door swelling and warping in damp conditions.

Colour options

Using the colourfast technology of powdercoating, we have a wide selection of up-to-date colour and finish options available.

Thermal efficiency

Insulated with a solid, premium grade foam inner core prevents the transfer of hot and cold temperatures for greater thermal efficiency for your home.

Aluminium construction

Constructed from aluminium for reliability and high performance under a range of weather conditions.

Security

Multi locking technologies are available for the increased security of your home.

Acoustic performance

Our doors reduce the transfer of noise into your home.

Latitude

Features

- Aluminium clad doors combining tongue and groove boards in either a vertical or horizontal pattern
- Sturdy frame around the door panel
- Customisable options include dual colour schemes, glass inserts, thermally improved system, and a range of door hardware.

Urbo

HARDWARE

Pull handle

Lock is fixed separately to the door and is activated by a key or interior turn knob. A four-point locking system is available. Apex or Windsor turn sets are compatible with this handle.

Available in

Small

Handle 255mm h

Large

Handle 323mm h

Lever handle

Offers multi-point locking, and when the handle is lifted upwards it activates locking rods at the top and bottom of the door for added security.

Available in

Small

Handle 120mm x 22mm
with a base plate of
212mm h x 32mm w

Large

Handle 150mm x 30mm
with a base plate of
292mm h x 44mm w

Urbo features

- Comfortable, smooth handles that can be powdercoated to your choice of colour.

Refer to your local manufacturer for the full range

A close-up, high-angle photograph of a modern, minimalist door handle and lock mechanism. The handle is a long, thin, cylindrical bar with a brushed metal finish, mounted on a white door. The lock is a simple, circular keyhole with a matching metal surround. The background is dark, creating a strong contrast with the white door and the metallic hardware.

Miro

HARDWARE

Pull handle

Lock is fixed separately to the door and is activated by a key or interior turn knob. A four-point locking system is available. Apex or Windsor turn sets are compatible with this handle.

Available in

Small

Handle 166mm h

Large

Handle 240mm h

Lever handle

Available in a variety of locking options. An upward handle movement activates multi-point locking.

Available in

Handle 117mm x 13mm
with a base plate of
210mm h x 30mm w

Miro features

- Contemporary classic die-cast handles, characterised by elegant, ergonomic curves
- Can be powdercoated to your choice of colour.

Refer to your local manufacturer for the full range

A close-up, black and white photograph of brushed metal hardware components, possibly a door handle or latch mechanism. The image shows several rectangular metal pieces with a fine, linear brushed texture. The lighting creates soft highlights and shadows, emphasizing the three-dimensional form and the precision of the manufacturing. The background is dark, making the metallic surfaces stand out.

Icon
HARDWARE

Pull handle

Fixed to the door on both the interior and exterior with a lock fixed separately. Apex or Windsor turn sets are compatible with this handle.

Available in

325mm, 630mm, 930mm, 1230mm, 1530mm, 1820mm

Lever handle

A clean compact lever handle. Available in a variety of locking options. An upward handle movement activates multi-point locking.

Available in

Small

Handle 110mm x 21mm
with a base plate of
210mm h x 30mm w

Large

Handle 150mm x 30mm
with a base plate of
290mm h x 45mm w

Icon features

- Strong, contemporary handles made of 316 grade stainless steel
- A brushed stainless steel finish.

Refer to your local manufacturer for the full range

Elemental

HARDWARE

Pull handle

Available in two standard sizes but can be made to any length by special order. The pull handle is separate from the lock, which is operated by a key or snib.

600mm, 900mm, 1200mm and 1800mm

Windsor turn set

Specifically designed for New Zealand conditions. A neat accompaniment to a set of pull handles offering easy and secure locking of your entrance door.

Windsor features

- 304 grade stainless steel or powdercoated
- A lock that is fixed separately to the door and is activated by a key or interior turn knob.

Yale Gripset

PRODUCTS

Mayfair

An elegant locking entrance set that allows ease of use with added security of a key deadbolt and a choice of lever or knob for internal handle.

Features

- Satin chrome finish
- Deadbolt cylinder and turn knob available
- Supplied as standard with 5-pin cylinders
- Kit includes both the Hawthorn lever and Orbit knob, providing choice for the internal handle.

Alexander

An elegant locking entrance set that allows ease of use with added security of a key deadbolt and a choice of lever or knob for internal handle.

Features

- Satin chrome finish
- Deadbolt cylinder and turn knob available
- Kit includes both the Hawthorn lever and Orbit knob, for your choice of internal handle.

Assure Keyed

This digital entrance set incorporates the new Yale Touchscreen Digital Deadbolt with the styling of the Mayfair and Alexander gripsets. This stylish combo is easy to install and is ideal for both new and retrofit applications.

Features

- Satin nickel finish
- Adjust lock features and personalise settings in the Yale app
- Create up to 12 unique pin codes
- Compatible with Android devices running 4.3 or later, iOS devices running 9.0 or later and Samsung Gear smartwatches running 4.3 or later.

Yale Digital

PRODUCTS

Assure SL

This sleek and modern touchscreen deadbolt allows homeowners to enjoy the convenience of 100% key free locking/unlocking. You will never have to carry around your keys again. Create unique pin codes for friends and family and remove codes whenever you need to.

The lock is Grade 2 certified and backed by Yale, one of the world's best known brands in the lock industry that's been securing homes since 1846, ensuring that your home and family is always safe.

Available in Matt Black, Satin Nickel & Oil rubbed Bronze.

7220 Digital Door Lock

The 7220 digital door lock is all you need on your front door. As a standalone digital lever, there is no need for an additional deadbolt lock, nor a latch or a separate door handle. Designed for single-hole doors (doors without a deadbolt).

The 7220 digital door lock is easy-to-install and conveniently replaces existing lever locks or knobsets. Access is easy - simply enter your code on the keypad, pull down the lever and you're in.

Smart Latch

The Yale Smart Latch allows users to retrofit their Nightlatches and have complete control over how they lock and unlock their door. Users can use a PIN code, key card or key tag to access their home securely.

Yale Access Kit

If you can control your music and heating from your phone, why not your doors? Well, now you can - with Yale Access you have full control of your door lock from your phone, no matter where you are! It is easy to lock and unlock, with a simple push of a button on the app you will be able to let your family, friends, cleaner, dog walker or the builder in instantly even when you are not home.

Surface Finishing

You can never have too many options when it comes to choosing a colour for your entrance door – which is why we have a large range of colours and finishes that you can choose from.

- Please ask your manufacturer for a colour brochure to see our full range of powdercoat options, including our range of popular colours
- Textured finishes such as Protecture™ and Mannex offer a low sheen surface finish highly resistant to marring and scuffing - specifically for use on entrance doors
- When you are choosing door colours, always assess swatches in natural light and consider aspect and exposure influence
- We have all of the Dulux powdercoat colours on offer, as well as more specific finishes.

Textured Surface Finish

Feel the finish on this door to give you an indication of this durable surface finish.

It will feel and look slightly different to powdercoating on the windows and doors in the rest of your home.

ProttextureTM / Mannex

A low sheen surface finish highly resistant to marking and scuffing – specifically for use on entrance doors. There are a wide variety of colours available. Please ask your manufacturer for a colour brochure to see our full range of powdercoat options.

Please note that the finish of the powdercoating will look slightly different to the powdercoating on your aluminium joinery. See the door on the previous page for an indication of surface finish.

Intensity

There are six bold bright Matt colours in this Dulux DURATEC range, ensuring excellent colour retention and are exceptionally hard wearing.

Dual colour

All of our doors are available in dual colour, with the exception of the Slimline, Commercial and Plasma. This means you can match the look of your internal and external colour schemes, rather than having to pick one look for both sides of your door.

Fading and bowing

Dark colours may not be suitable for doors that are exposed to prolonged direct sunlight as this may cause the colour to fade, so careful consideration needs to be made when choosing your entrance door colour/s.

Doors with a thermal polyamide strip built into them may experience slight temporary bowing due to the difference in temperature between the inside and outside of the door, especially when exposed to direct sunlight. We stress that this is only a temporary effect and the door will revert back to its normal shape as the aluminium cools. This may occur primarily with dark colours, so can be minimised by selecting lighter external colours or increasing cover over the door area.

Woodgrain finish

This unique application gives the appearance of natural wood, with all of the benefits of an aluminium door.

The colours shown above are indicative only.
Consult your local manufacturer for an aluminium colour swatch.

Home of quality brands

The First brand is owned by APL Window Solutions, New Zealand's leading window systems company.

At APL our primary focus is quality.

From aluminium extruding and surface finishing to specialised manufacturing and distribution, we continually invest in leading-edge products and processes.

APL also brings scale. We have New Zealand's largest extrusion plant, an in-house powdercoating facility, and a manufacturing subsidiary for specialised aluminium projects. We use our own specialised distribution fleet to make sure the product arrives at our manufacturers in the best possible condition.

An extensive network of First manufacturers stretches throughout New Zealand. These businesses are individually owned and managed, with knowledge, expertise and skills to assist with your next building or renovation project. They are exclusive providers of the First range of products.

See our website for manufacturer details, or visit your local First manufacturer to view our wide range of windows and doors.
